

# AGREEMENT

## PROJECT OBJECTIVE:

The goal of the project is to create an agreement for the transfer of goods from one place to another.

## PROJECT DESCRIPTION:

This project talks about the agreement for the transfer of goods, manage and maintain agreement for different vendors.

Project describes the vendor details, captures, revises, renews and termination of the agreement, loading and unloading goods.

## PROJECT SCOPE:

Agreements classified into **Dashboard, Agreement, Renew, Revise, Terminate Agreement, category and location.**

**Dashboard:** Dashboard of agreement will show the information about the process did in the application.

Contents of Dashboards is to project the application in a simple manner.

**Agreement:** The Agreement menu is the platform where users can be able to view the existing agreement and able to add the new agreement.

Active agreement should be downloadable in bulk. Latest and expired agreement will be sorted based on validity date.

In the event the agreement is revised before the expiry date then the previous agreement date should be considered.

Search option is to find out the required agreement as per the user needs. List of agreements can be downloaded as CSV, Excel and PDF.

All the latest and expired agreements should sort based on active and inactive agreements.

Agreements can be renewed Quarterly, Monthly, and annually. Every Agreement can be revised based on the user's convenience. The agreement can also be terminated if needed.

## Category:

Category is the platform where user can be able to view the existing category and able to add new category

## AGREEMENT

Categories are spitted into
