

# MOULD

## PROJECT OBJECTIVE:

For new product development a Mould should be fixed in the plant. To approve a Mould, all the particulars from the Product Development Team to the vendor should be documented and get approval to deliver it to the plant.

## PROJECT DESCRIPTION:

Mould is a **Web Based Portal**. This project is to capture and document the Mould order initiation from the Product Development team till it get delivered by the vendor. This process consist of different roles with different approvals/verifications and 2D/3D Mould diagram, asset code, cost center code, PO, performance invoice, calculation sheets to process the Mould order, vendor finalizing and payment process can be uploaded, after these process the vendor will submit the Mould samples to organization for trail and after the trail approval the vendor will start to work on the major production and deliver the Mould to the plant directly.
